

# Year 6

## English

## Maths

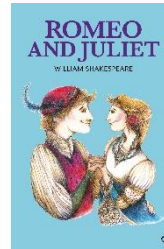

In maths, we will complete our learning about statistics by creating our own pie charts.

We are also preparing for secondary school by learning to use a calculator.

We will also be consolidating all our primary school maths learning through problem solving activities.

**This half-term**

**we are reading:**

In English, we will finish studying Romeo & Juliet by writing a descriptive narrative about the duel scene between the Montagues and Capulets.

The children will also write a balanced argument about mobile phones for under 16s and a letter recounting their trip to PGL.

## Summer 2

## RE

This half-term the children will debate the topic **'Rules and Responsibilities: Who Decides?'**

They will consider why we have rules, look at guidelines in the Islamic faith and develop their own creeds for life.

## Science

We will build on our learning from last half term with our big question **'How can we stay healthy?'**

The children will investigate the impact of exercise, diet, drugs and lifestyle on the human body. This will develop their understanding of how to live a healthy lifestyle.

## History

In our final history unit, we will learn about the ancient Maya and answer the question **'How did the Maya civilisation contrast with British history and what were the achievements of the earliest civilisations?'**

## PE

This half-term, our units are cricket and outdoor adventure activities.
