Area of a triangle (1)
(1) Complete the sentences to describe
the triangle.
The triangle has $\square$ full squares.

The triangle has $\qquad$ half squares.

The area of the triangle
 $\mathrm{cm}^{2}$

2) Count squares to work out the area of each triangle.
a)

area $=$ $\qquad$ $\mathrm{cm}^{2}$
b)

area $=$ $\square$ $\mathrm{cm}^{2}$
c)

area $=$ $\square$ $\mathrm{cm}^{2}$
d)

area $=$ $\square$ $\mathrm{cm}^{2}$

3 Count squares to estimate the area of each triangle.
a)

area $=$ $\square$ $\mathrm{cm}^{2}$
area $=$ $\square$ $\mathrm{cm}^{2}$
b)

Why are your answers estimates?
(4)
a) Work out the areas of the shapes by counting squares.

area $=\square \mathrm{cm}^{2}$

area $=$ $\square$ $\mathrm{cm}^{2}$
b) What do you notice about your answers to part a)? Explore this using other rectangles.

c) Write your findings.

Draw a triangle that has an area of approximately $15 \mathrm{~cm}^{2}$

6

Do you agree with Eva's estimate? $\qquad$
Talk about it with a partner.
(7) Draw triangles with these areas.

| $1 \mathrm{~cm}^{2} 2 \mathrm{~cm}^{2} 3 \mathrm{~cm}^{2} 6 \mathrm{~cm}^{2} 5 \mathrm{~cm}^{2} 6 \mathrm{~cm}^{2}$ |
| :--- |
|               <br>              $\|$cm     <br>      <br>      <br>      |
|  |

Talk to a partner about the best strategies for drawing the triangles.
