

Investigating Inheritance and Variation

Investigate the characteristics you have inherited from your parents by closely examining their photographs and your own. Write down what you think you have inherited from that parent.

The diagram consists of two large, empty rectangular boxes with rounded corners at the top, representing parents. These boxes are connected by a horizontal line. From the center of this line, a vertical arrow points downwards to a single, larger empty rectangular box with rounded corners at the bottom, representing the child.

Inherited:

Inherited:

A large, empty rectangular box with rounded corners, intended for the child's characteristics. It is positioned centrally below the parent boxes and above the child's list of inherited traits.
